

AI-Driven Quality Engineering Platform with Predict Capabilities.

BlueSwanTM
A Cigniti Platform

BlueSwan™ is Cigniti's Next Generation, Proprietary Testing Platform that helps you deliver truly reliable, robust, scalable, & highly secure applications. It comprises of the following elements that bring multiple benefits for your enterprise.

Verita Quality Engineering Platform and Dashboard with predict capabilities & analytics offers you descriptive, diagnostic, predictive and prescriptive insights related to your QA & QE organisation.

- Gain meaningful & real-time insights from data from disparate tools in an enterprise tool ecosystem
- Generate accurate, predictive Testing reports to help you take informed decisions
- Identify slack in the process, Improve time-to-market by reducing test cycle duration, helping you release new features faster
- Increase revenues & Reduce costs by faster defect prevention, detection, & resolution

Velocita provides Test Accelerators for multiple Industries including Airlines, BFSI, Healthcare, Retail, Hospitality & Automation Accelerators for Kiosks, POS, COTS, ERP & Digital Apps.

- Leverage Intelligent Automation Framework to achieve higher ROI
- Significantly reduce time for testing framework setup & testing cycle
- Jumpstart & Accelerate Test Automation while increasing Test Automation coverage
- Enjoy higher Reusability & Maintainability by lowering total cost of quality

Cesta is Cigniti's patented integrated Test Asset migration platform consisting of QuickLean, Migrate2Selenium, M2TC & other tools to migrate test assets from one tool stack to the other.

- Leverage its Patented methodology to offer you seamless test asset migration
- Boost your Test Asset migration speed by up to 15 times
- Reduce efforts up to 90% while being 10 times more cost efficient
- Assure Quality of migrated test assets by customisation as per your business process
- Reuse 100% migrated and executable test scripts

Cigniti's Process Accelerator Platform which helps in transforming our clients' QA & testing practices by assessing processes, practices, tools, skills, & risks during large-scale, enterprise QA transformation.

- Bring in greater efficiency across your QA enterprise
- Identify & mitigate risks early on, that reduces cost of quality & increases revenue
- Benchmark & highlight your org processes with the ones used in the industry
- Generate a high test-execution throughput & high performance in QA teams
- Shorten testing cycle times & Reduce outages

Prudentia

Cigniti's model-based testing tool that automatically generates software testing artefacts using system requirements, leveraging its patent-pending algorithm.

- Increase test coverage & reduce cost, while lowering test design time
- Generate a high test-case yield, allowing shortening of cycle times

CESA is Cigniti Enterprise Sentiment Analyzer which crawls, captures end user feedback from publicly available sources and provides insights towards improving end user Engagement, Emotion & Experience

- Gain insights from Customer Sentiment and Opinion Mining while maximising your customer experience quotient
- Prioritise business decisions effectively based on direct user feedback cluster analysis
- Detect patterns in customer behaviours, & track early product feedback to improve the product/app quality

Cigniti is World's largest Independent Quality Engineering Services company bringing the power of AI into Agile & DevOps, to accelerate enterprise digital transformation journey. We help world's leading enterprises build quality software & accelerate speed to market while lowering the overall cost of quality & driving a huge positive impact to ROI from their QA, QE & Digital initiatives.
